Experience:

Full Stack Developer, Intelligent Dive   **Aug 2023 - Mar 2024**

- Developed responsive UI components with React and Redux, boosting user engagement.
- Improved performance through lazy loading and code-splitting, reducing page load time.
- Optimized API integration and data handling with Axios and TanStack Query, speeding up data fetching.

Skills:

Expertise: JavaScript, ES6, TypeScript, Next js, React, Tailwind, Node.js, Redux, MongoDB, Express.js
Comfortable: Firebase, Shadcn, Material UI
Tools: GitHub, VsCode, Chrome Dev Tool, Netlify, Photoshop, Figma, Postman

Projects:

1: Schedulify   Live Website | Client Repository | Server Repository

- Admins can perform CRUD operations on rooms, slots, bookings, and users.
- Users can book slots for specific rooms, view bookings, make payments, and update their information.
- Authentication and Authorization are secured with JWT tokens and role-based route access.

2: Twstudy   Source Code | Live Website

- This is the Online Courses website. This is a fully responsive website.
- It is built with Html, CSS, javascript, and bootstrap
- There are multiple color theme sections added, and this site is fully responsive
